Experience

07/15 — Present   **Marketing Developer**, Sprout Social, Chicago, IL

Working with visual designers to implement every fine detail and interaction on landing pages, microsites, emails, and all other interactive marketing materials. Redeveloped the highly trafficked 4 year old WordPress theme. Assisting with site architecture and helping build out the technical vision for our web presence. Helping execute SEO/SEM strategy and integrate SEO best practices. Optimizing images, CSS, and JavaScript to maximize site speed and performance. Assisting with website performance monitoring to ensure that web properties have acceptable Time to Interact and Time to First Byte metrics as well creating performance benchmarks. Writing performance focused Javascript for analytical tracking. Assisting in the creation of multivariate test campaigns.

Skills used: JavaScript (React), PHP, CSS, HTML, Multivariate Testing

01/14 — 07/16   **Front End Developer**, StageBloc, Chicago, IL

Worked as part of StageBloc's front-end team, creating features and optimizing existing functionality. Shipped code every day and ran product and UX brainstorming sessions. Developed QA testing plans. Create high

performing, scalable solutions for various business and technical problems. Iterated solutions based on internal and external feedback. Developed many custom themes for artists such as Kid Rock, Eric Church, Kenny Chesney, and Metallica.

Skills used: JavaScript, PHP, SCSS (SMACSS), HTML, Sketch

08/11 — 10/13   **Lead Web Developer**, 530medialab, Cypress, CA

Initially hired as a Front End Developer, I grew with the company and quickly became the team lead eventually managing a team of 7 developers leading projects from e-mail marketing campaigns to large-scale ecommerce applications.

Skills used: JavaScript (jQuery, AngularJS), PHP, CSS/SCSS, HTML, Photoshop, Shopify, WordPress, Email Marketing, QA Testing (Selenium)

08/11 — 10/13   **Web Developer**, Accelerate Online, Torrance, CA

Duties included successfully creating and managing several E-Commerce websites as well as WordPress templates.

Skills used: JavaScript, PHP, CSS, HTML, Illustrator, Photoshop
